

CENTERITY'S SERVICE PACK FOR APACHE NIFI

KEY FEATURES

- In-depth monitoring of all critical metrics
- Real time data and historical graphs
- Dynamic critical and warning thresholds
- Monitoring NiFi components status

ADDED VALUE

- Easy configuration
- Improved performance and efficiency

Overview

Apache NiFi is real-time integrated data logistics and simple event processing platform. Apache NiFi automates the movement of data between disparate data sources and systems, making data ingestion fast, easy and secure. The Centerity monitoring for Apache NiFi is offered via the NiFi API.

Apache NiFi Available Metrics Example List

- **APACHE NIFI [Processor State]**
- **APACHE NIFI [Processor Bytes Read]**
- **APACHE NIFI [Processor Bytes Written]**
- **APACHE NIFI [Processor Flow Files In]**
- **APACHE NIFI [Processor Bytes Out]**
- **APACHE NIFI [Processor Bytes In]**

- **APACHE NIFI [Processor Flow Files Out]**
- **APACHE NIFI [System Utilization]**
- **APACHE NIFI [System Heap Utilization]**

About Centerity

Centerity’s award-winning software is an unified enterprise-class IT monitoring and performance analytics platform that improves performance and reliability of business services to ensure availability of critical systems. By delivering a consolidated view across all layers of the technology stack, including applications, Big Data, operating systems, database, storage, compute, security, networking, Cloud, Edge and IoT/IIoT devices, Centerity provides an early warning of performance issues along with corrective action tools to quickly isolate faults and identify root causes.
